DOCUMENT SECURITY REDEFINED

SECURE WITH *eSekure*™

Having the right person in the right place is as crucial as the surgeon's scalpel being in the right hands. And eSekure, developed by TRS Forms ensures just that. Being the sure-shot solution to protect data in any document from being tampered, eSekure is fast growing to become the one single bugbear of counterfeiters globally -- the breakthrough to the Ultimate in Security of documents.

Fake documents and certificates have been a menace plaguing academic institutions and corporate giants for a long time now. Verification is vital but manual verification is tedious. An institution/organisation is also at the mercy of a third party to authenticate the information. eSekure obviates all these hassles; with eSekure, verification is a matter of a few clicks.

REDEFINING THE CONTOURS OF SECURITY

The highly qualified team at TRS Forms took up the challenge and achieved The BREAKTHROUGH. A world-class product that solves all problems in securing a document and presents the client an easy way to protect valuable data in any document. The solution is a SECURITY MARK which stores variable data. This mark generated by the issuing authority is printed on the document along with other variable data. To verify data on the document, the mark is scanned to decrypt, decode and display the data stored. This is done through the eSekure browser-based platform.

eSekure™ - THE 360 DEGREE SOLUTION

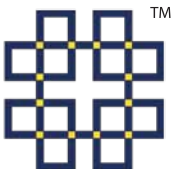

- Can be used on any platform using the internet
- Creates 100% tamper-proof documents
- Easy to create a security mark
- Instantaneous process to verify facts
- Security marks can be printed on ordinary paper or electronically and are unique to each document
- Does not require access to original database during verification
- Eliminates the need for third-party agencies and issuing authorities
- No software, no investment and no maintenance cost
- User friendly interface
- Cost-effective and time-saving
- Process is compliant with Family Educational Rights and Privacy Act (FERPA)

STAMP OF SECURITY

Methods adopted till now like the repository system (used in China and some European countries), Electronic Data Interchange (EDI or EDX) used in most American Universities and eTranscripts system that uses a software to create PDFs are beset with problems. These include dependence on third parties and extra expenditure among other things. Following the best logic in the industry, eSekure eliminates all these problems at one go. This is backed by solid facts.

eSekure developed by experts at TRS Forms, India, is a revolutionary cost-effective product, simple to use, time saving and provides ultimate security to your documents. All you need to do is to scan the document and upload it on www.eSekure.in / www.eSekure.us.

Wisdom, according to the ancient lore, lies in discriminating between what is true and what is false. In our ultra-modern world, eSekure makes that wisdom available to everyone, at the click of a mouse.
